

# Foot Licking

*"My dog licks his paws all of the time. What does this mean?"*

This is an indication of allergic response and there is itching within the feet. There are many potential allergens including airborne, contact, and food allergens. If it is persistent or if your pet is doing damage to itself and is uncomfortable, you should consult with your veterinarian for symptomatic treatment and/or avoiding the potential allergen.

**PLEASE CONSULT OUR CLINIC AT 770-977-9000 IF YOUR PET IS SHOWING THESE SYMPTOMS.**
